

## **The Kemp Residence** ***Confidence in Project Management***

*“ In the fall of 2003 I made the decision to spend winter in Florida’s mild climate instead of my Maple Plain home. Until then, I had been working with a design consultant on remodeling my home because of my deteriorating health and was concerned about leaving before construction was underway.*

*Accessibility Design took over the project and after four hours of working with their consultant, I knew my home was in good hands and I could rest easily in Florida. Understanding that my future abilities and needs are uncertain, Accessibility Design provided a space customized to my needs now and flexible to meet my needs in the future. Everything from designing the new master bedroom / bathroom suite, overseeing construction and purchasing products was handled professionally and with my interests in mind.*

*It is reassuring to know that I can fully live the remainder of my life with ease in the comforts of my home, thanks to Accessibility Design.”*
